Subject: PRO Consent Decrees

To Whom It May Concern,

Ending Antitrust Consent Decrees will have a severe negative impact on the live music industry and the communities that we as promoters of live music seek to enhance. Our facility exists to serve our community. The community benefits from live music experiences. Unregulated music licensing will prohibit us from being able to present live music to our community, hurting the community and the artists who own the copyrights.

Thank you for your consideration.

Jeff Vaughan | Director of Facility Services
